

Metal Seated Ball Valves

STAR LINE[®]

CLASS V & VI SHUT OFF

The production of a zero maintenance, high performance metal seated valve has been the goal of many engineers. Starline are unique as their combination metal seat/viton seat offers true class VI shut off. The seamless design has been simulated by TUV Gas for 50 years service. Sand and many other particulates will not damage the unique bonded special formulation viton seat inset. Starline also manufacture a pure metal to metal seat for high temperature and more aggressive abrasive service.

For certain applications such as abrasive media or high temperature, soft seated ball valves are not suitable and the ultimate solution is to use a top quality metal seated valve but at a reasonable price. **100% ITALIAN MADE.**

Starline's range of METAL SEATED BALL VALVES provides a high performance, zero maintenance, high quality standard production ball valve with a competitive price and relatively short delivery time. The production of STARLINE METAL SEATED BALL VALVES has been divided in two different categories: HIGH TEMPERATURE and ABRASIVE SERVICE.

Starline has developed its standard production to obtain a contained cost ABRASIVE SERVICE metal seated ball valve, tested by simulating a 50 years life service in an abrasive environment with water containing river sand, welding rods and other abrasive particulates. The HIGH TEMPERATURE floating ball and trunnion mounted bi-directional metal seated valves has been developed by Starline for customers looking for a reliable valve at a competitive price.

Additional information on the full range of Starline floating & trunnion mounted metal seated ball valves, go to www.globalsupplyline.com.au/catalogue-starline.html

STARLINE WELDED BALL VALVES FOR GAS STORAGE

One piece seal welded body, floating ball double block. Primary seal METAL, to METAL, secondary seal vulcanized Viton or NBR, pressure safe cover for the stem to prevent any leakage. For operation remove the cover.

Completely in accordance to spec. KN251-005.

Specifically designed as shut off drain and vent lines for larges valve sizes and as Gas Storage valves, these valves have passed a critical prototype testing simulating 50 years service life with raw gas, and sand.

LIST AND MATERIAL OF COMPONENTS

PART NO.	UNIT Q.TY	PART NAME	MATERIAL
1	1	PRESSURE CAP	ASTM A105/C22.8
4	1	STOP PLATE	S.S. 304
5	1	STEM	AISI 4201.4021 HARDENED
7	1	THRUST WASHER	REINF.PTFE
